SUMMARY

Computer Science graduate aspiring to become an AI Engineer, with project experience in AI integration, Retrieval-Augmented Generation (RAG), and semantic retrieval. Skilled in Python, OpenAI APIs, SBERT, FAISS, and FastAPI. Eager to develop AI-powered applications and solve real-world problems.

SKILLS

TECHNICAL SKILLS

- **AI:** OpenAI API, Gemini API, SBERT, FAISS, RAG, OpenCV, Semantic retrieval, Prompt engineering
- **Programming Languages:** Python, PHP, JavaScript, SQL
- **Backend Development:** FastAPI, CodeIgniter 3, REST APIs
- **Databases:** MySQL, Supabase, PostgreSQL
- **Web & Mobile Development:** HTML, CSS, Bootstrap, React Native, Expo
- **Tools & Technologies:** Git, OpenCV, Google Cloud Run

PROJECTS

LexiAid: Mobile Based Legal Information Chatbot for Women and Children *January 2026*
Cavite State University - Imus Campus – Thesis

- **Mobile Application Development:** Developed a mobile-based legal information chatbot designed to provide accessible legal guidance for women and children.
- **AI Integration:** Implemented AI-powered chatbot functionalities with bilingual support to improve accessibility and user interaction.
- **Legal Assistance Features:** Integrated hotline access and legal information retrieval for immediate support and guidance.
- **Backend Development:** Built backend APIs and chatbot workflows using FastAPI and Supabase for data storage and retrieval.
- **RAG Implementation:** Applied Retrieval-Augmented Generation (RAG) to enhance response accuracy using contextual legal information.

TES: HR Management System *January 2025*
Cavite State University - Imus Campus

- **Full-Stack Development:** Designed and developed both front-end and back-end components of the HR management system for employee records, attendance, and leave requests.
- **Attendance Monitoring:** Implemented time-in/time-out tracking with facial recognition integration to improve attendance accuracy and security.
- **Leave Management:** Built leave request, monitoring, and summary modules for efficient HR processes.
- **AI Integration: Applied** OpenCV and Python for facial recognition functionality.
- **Database Management:** Designed and maintained the database structure for employee, attendance, and leave records.

Leave Management System *December 2024*
Cavite State University - Imus Campus

- **System Development:** Developed a web-based leave management system for handling employee leave applications and approvals.
- **Feature Implementation:** Implemented user authentication, leave request submission, status tracking, and admin approval dashboard.
- **Reporting System: E**nabled real-time leave balance monitoring and generated summary reports for HR management.
- **Database Management:** Designed and maintained MySQL databases for employee and leave records.

Evaluation Management System *July 2023*
Cavite State University - Imus Campus

- **System Development:** Developed a web-based system for managing teacher evaluations.
- **Evaluation Management:** Implemented features to support the submission and management of teacher evaluation responses.
- **User Interface:** Designed interfaces to make the evaluation process accessible and easy to use.
- **Database Management:** Worked with database operations for storing and managing evaluation records.

EDUCATION

Bachelor of Science in Computer Science *2022 - 2026*
Cavite State University - Imus Campus

Senior High School Graduate - STEM *2020 - 2022*
Unida Christian Colleges
Graduated with Honors

SEMINARS

AI TALKS: Arising Innovation: The Future and Ethics of AI
Cavite State University - Imus Campus, June 2024

Coding Clique: A Basic Web Development Bootcamp for Beginners
Zuitt Tech Career Program, 2024

WORK EXPERIENCE

Web Development Engineer Intern *July 2025 - September 2025*
St. Dominic College of Asia

- Developed and improved front-end features for the institution's student portal.
- Collaborated with developers using Git-based version control workflows.
- Fixed UI bugs and enhanced mobile responsiveness across devices.
- Participated in testing, debugging, and team development activities.
